PARKING SERVICES NEWS RELEASE

FOR IMMEDIATE RELEASE: November 18, 2022

ISSUED BY: Parking Services

SUBJECT: 140 West Parking Deck Repair Project

CONTACT: parking@townofchapelhill.org

The 140 West parking deck will undergo a restoration/waterproofing project for approximately ten weeks beginning in December to fix the water leaks, along with some plaza resurfacing and additional bollards to prevent vehicles from driving on the plaza level. The 140 West Parking Deck will start to see activity mid-December, around the 12-16, which will affect an area of 30-parking spaces at a time on the public parking level. The EV-charging stations will be affected for a period during construction.

The lower level, private parking spaces for residents, will be blocked for a Sunday night into Monday at a later date in the project. This coordination is to take care of the only entry/exit for the private parking at a time least used. The Town will coordinate with the 140 West condominium association to move residents' cars to another Town parking lot during this period, so the residents will have access to their vehicles if needed. The contractors will place plastic drapes as a barrier to protect parked cars and to help control dust on the public parking level. All dates and timeframes are weather dependent and may be adjusted as needed.
